# **Group Introduction**

Phone In Group, originally established as LI RAY Company in 1983, has been dedicated to the magnetic materials industry. In 1990, the company began collaborating with manufacturers in mainland China for magnetic materials, and in 1999, Phone In Mag-Electronics Co., Ltd. was established. The Phone In Group has invested in and established factories in Dongguan, Suzhou, Xinyang, and Ningbo, China. In 2023, Phone In Mag-Electronics Co., Ltd. (BVI) established a branch in Taiwan and a factory in Vietnam, with the goal of becoming a publicly listed company.

Thanks to the efforts of all employees and the exceptional leadership of the company, Phone In Group has established production and sales bases in China, Taiwan, Vietnam, and San Francisco, expanding its global magnetic materials business comprehensively.

Phone In Group has developed into a supplier for world-class brands in smartphones, 3C products, wearable devices, new energy electric vehicles, and motor manufacturers. Its quality has reached world-class advanced standards, with a reputation for excellent quality, competitive pricing, fast delivery times, advanced magnetic performance, and processing research and development technology, as well as automated magnetic component assembly capabilities.

# **Group Overview**

#### **Establishment Date**

December 1999

#### **Factory Locations**

- 4 Factories (Xinyang, Dongguan, Ningbo, Vietnam)
- 1 NPI Center (Suzhou)

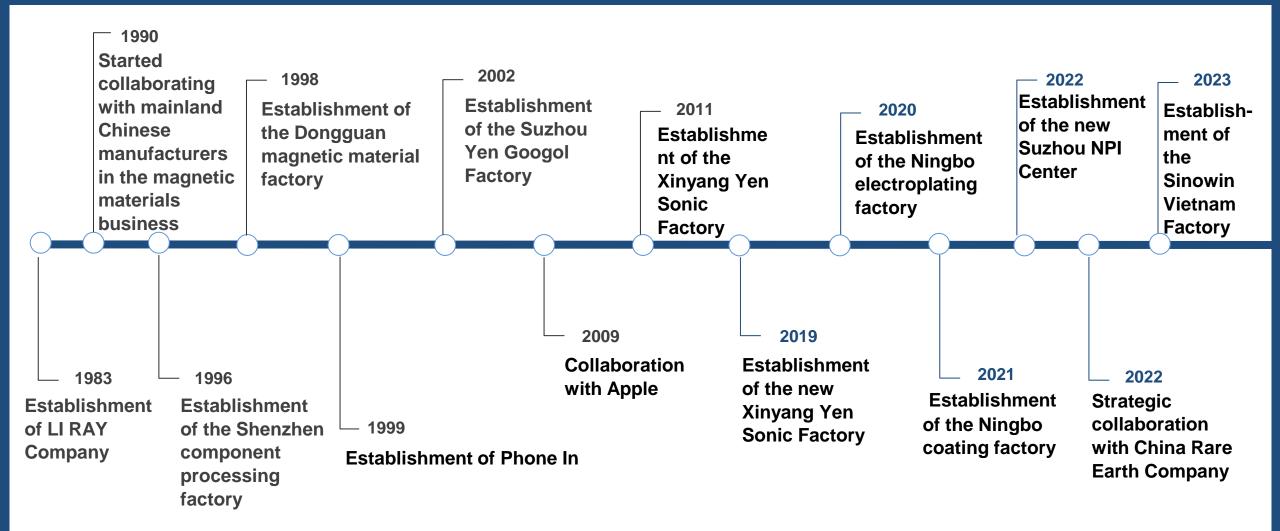

## Capital

\$30 Million USD

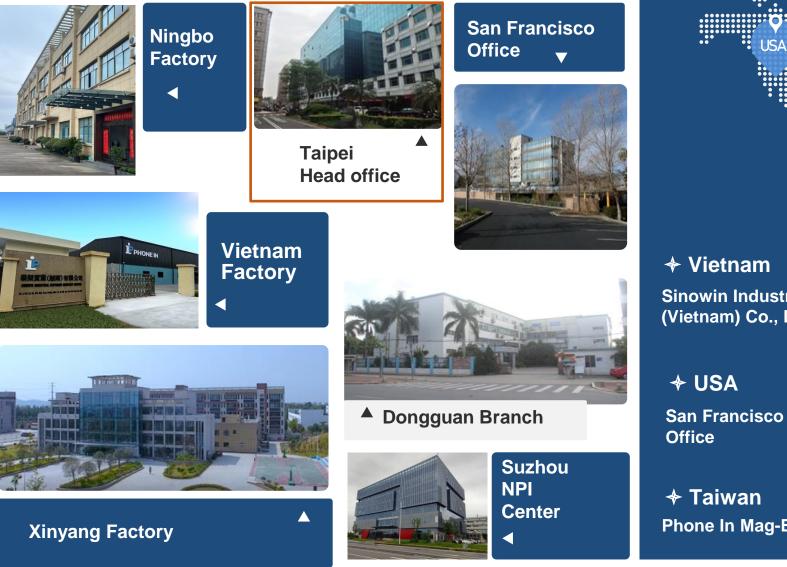

#### Global Employees

- > 600 (China)
- > 20 (Taiwan)
- > 50 (Vietnam)
- ≻ 5 (USA)

## **Application Areas of Sintered Nd-Fe-B Magnets**

## Bonded Nd-Fe-B magnets

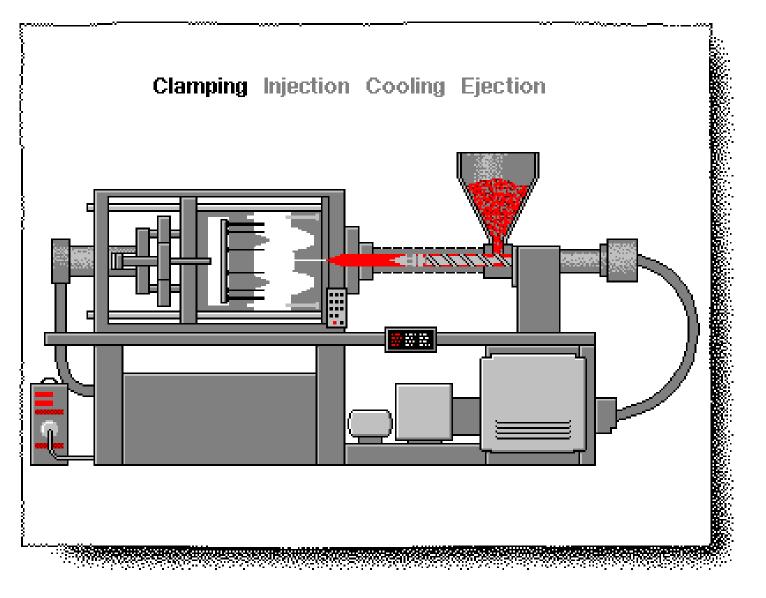

Compression Molding	g Injection mo	Iding	Extrusion	Calendering
Characteristic	Compression Molding	Injection molding	Extrusion	Calendering
Magnetic powder filling ratio (volume fraction)	70-85 (%)	50-70 (%)	60-80 (%)	50-70 (%)
Magnet porosity (volume fraction)	5-8 (%)	2-5 (%)	3-6 (%)	6-10 (%)
(BH)max/(NdFeB as an example)	12-18 (MGOe)	4-15(MGOe)	10-11(MGOe)	6-8(MGOe)
Dimensional accuracy (taking Φ30mm as an example)	±0.03	±0.03	±0.03	±0.05
Shape complexity	Middle	High	High	Low
Temperature resistance	High	High	High	Low
Advantages	High magnetic properties	Integrated molding, strong impact resistance	Long size, complex cross-sectional shape	Long size, Strong impact resistance

## Advantages of injection molded magnets

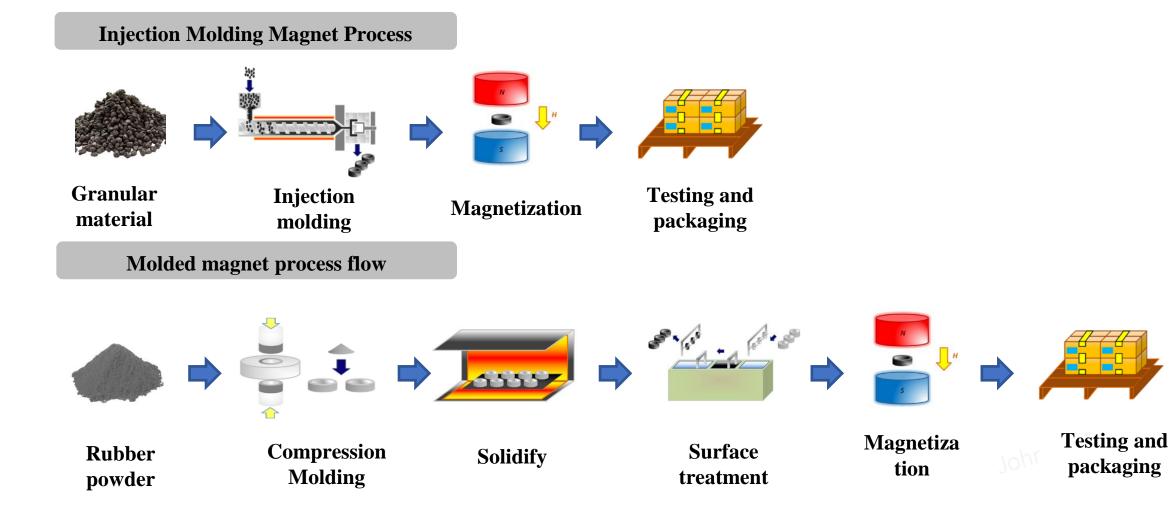

Advantages of injection molded magnets:

- **1. Short process flow;**
- 2. High resistivity;
- 3. High shape freedom;
- 4. High magnetization freedom;
- 5. No surface treatment required;
- 6. Simplified engineering;
- 7. Strong impact resistance

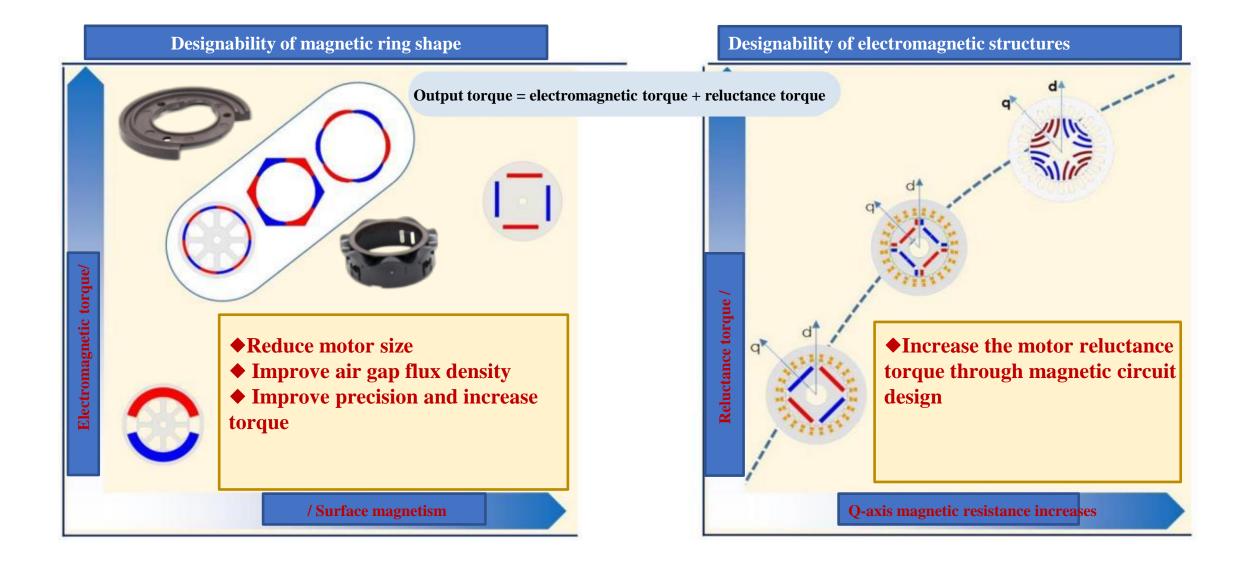

(good toughness)

#### Short process

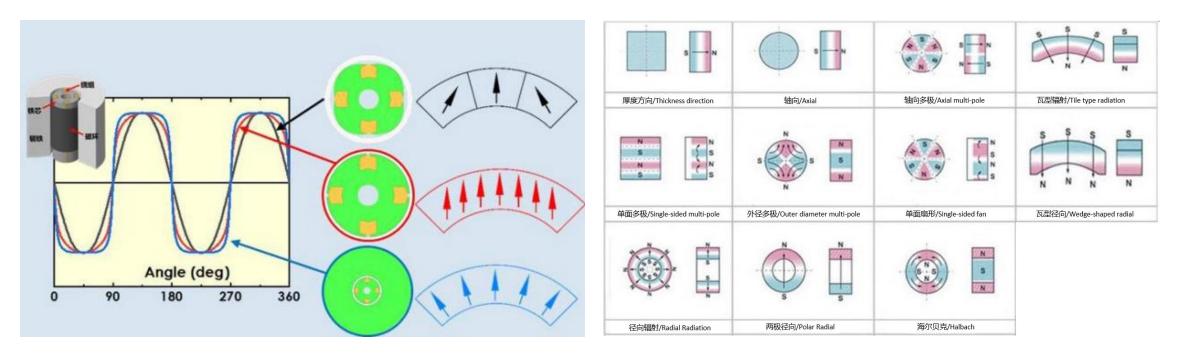

## High shape freedom

## High magnetization freedom

The magnetic field waveform distribution on the surface of the magnetic ring can be customized according to the motor use requirements (sine wave/square wave/saddle wave)
Reduce motor harmonic distribution, reduce motor operating noise, and improve motor operating efficiency

## No surface treatment required

- Injection molded magnets have good chemical stability. After being immersed in acid, alkali, organic solvents, oils and water at room temperature for 10 days, the mass generally increases by only 0.2%~0.5%, and there is no abnormal change in magnetism and appearance.
- The quality, appearance and magnetic properties of injection molded magnets change very little after being tested at low temperature (-40 °C), high temperature (100 °C), thermal cycle, immersion, moisture resistance, weathering and salt spray.

## Injection Molded Magnets Grade

Grade	Br/kGs	Hcj/kOe	(BH)m/MGOe	Tw/°C
PIM-17	8.7-9.5	13.0-14.5	16.5-17.5	120~180
PIM-15	8.2-9.0	13.0-14.0	14.5-15.5	120~180
PIM-13	7.2-7.7	7.5-10.0	13.0-14.0	120~180
PIM-10	6.5-7.2	7.0-9.2	10.0-11.0	120~180
PIM-8	6.0-6.8	7.0-8.0	7.5-8.5	120~180

# **Hot-Pressed Nd-Fe-B Ring Magnets**

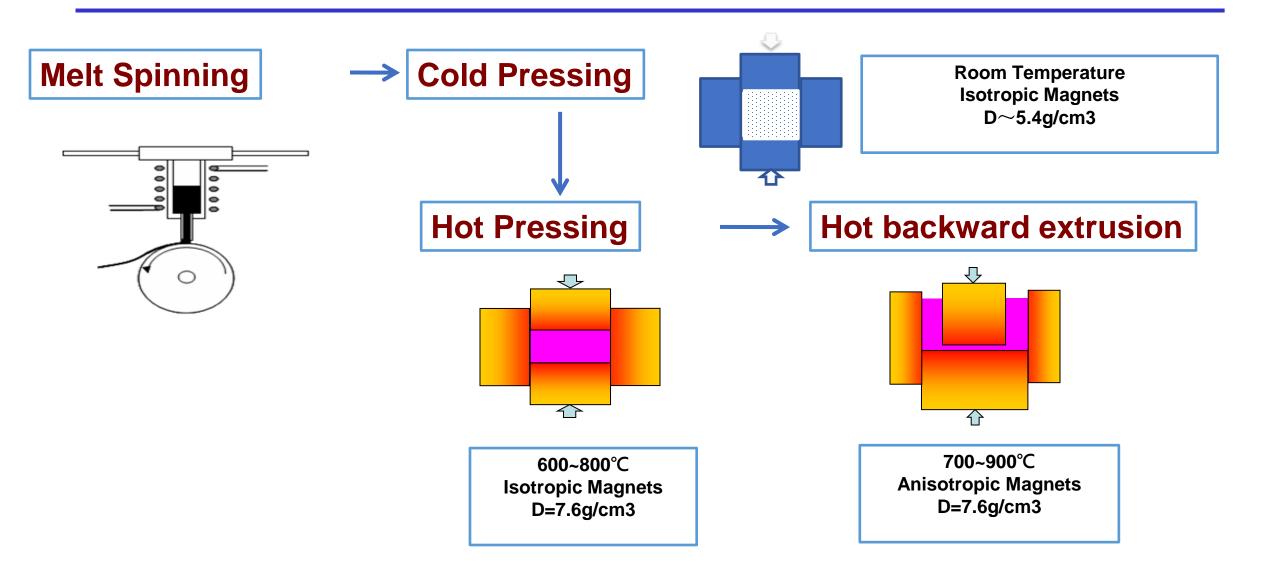

Radially Oriented Ring magnet can be multimagnetized and uni-pole magnetized. Compare with traditional Arc magnet, our product advantage mainly as follows:

1-Assembling easier, no fall off problem and save cost of concerned assembling part,

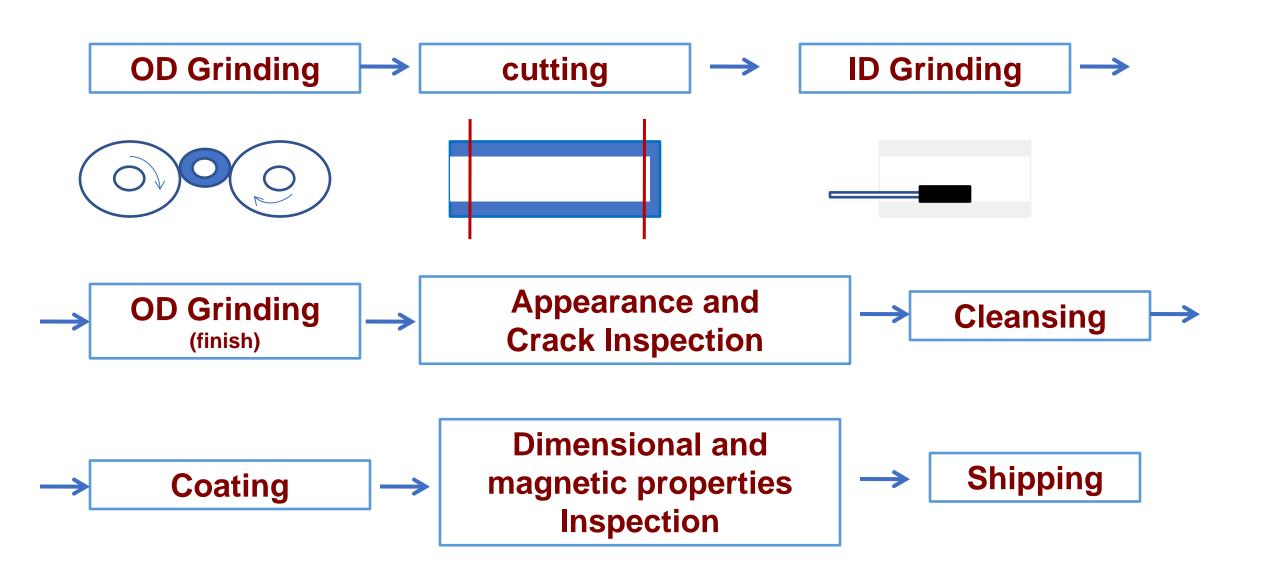

2-Optimized the magnetic field and motor structure, improved the motor running property,

3-Can be magnetized in freely as union-pole, multi-pole or skewed.

### **Manufacture of Ring Magnets**

#### **Manufacturing of Ring Magnets**

#### **Dimensions and tolerances**

Dimensions (mm)	min	max	
Inner diameter/Outer diameter		0.9	
(ID/OD)	0.7		
Hight	0.5	50	
Diameter	10	60	
Optimum Diameter	20	40	

Tolerances ( mm )	OD	ID	н	concentricity	roundness
Machined magnets	±0.03	±0.03	±0.1	0.03	0.03
Coated magnets	±0.04	±0.04	±0.05	0.05	John 1106 0.03

## Application - Servo motor 40,60,80

For servo motor, our hot-pressed ring are now replacing sintered radial ring, because of better performance.

## **Application - Thin-wall thickness**

After injection molding

Magnetization

## **To replace Bonded ring**

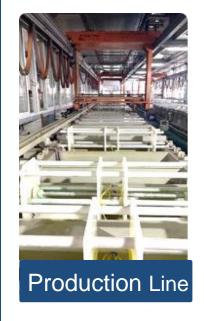

OD20\*ID18\*20, 40H, passivation

Thin-walled rings can be fabricated by hot pressing to replace bonded magnets, because of better magnetic performance.

# New Electroplating Factory

Electroplating Factory Production Line

Plasma Emission Spectrometer

# New Coating Factory

Epoxy resin enhances the corrosion resistance and insulation of magnets.

Phone In Group has independently developed an automated epoxy resin coating process, achieving automated loading and unloading, and a digitally controlled production process. This ensures quality, reduces manpower, lowers costs, and successfully establishes core technology standards that meet Japanese industry benchmarks.

#### Green Manufacturing Beyond 100% REE, Phone In Group does more in Green Manufacturing

100% of available area covered with solar panels. Solar power generation increased to 45% of total capacity in 2023.

Reduced natural gas usage by 20%. Insulation layer installed for heat collection and reuse. 30% recovery of electroplating wastewater. Collaborating with local government. Reduced pollution emissions by 65%. In 2023, using recycled rare earths reduced the mining of rare earth ores by approximately 240 tons.

# Laser-Cut Machining

Phone In has applied over 30 years of experience in magnet manufacturing to develop and introduce laser cutting technology with simplifes the machining process. This method optimizes recycled material utilization as well as reduces overall carbon emissions. Laser cutting is applicable to various magnet specifications

Creating a new chapter of environment protection, high efficiency, clean workshop and stable manufacture.

## **Customer Service**

Design and Manufacturing

Services

- Core Values
- Excellent Customers

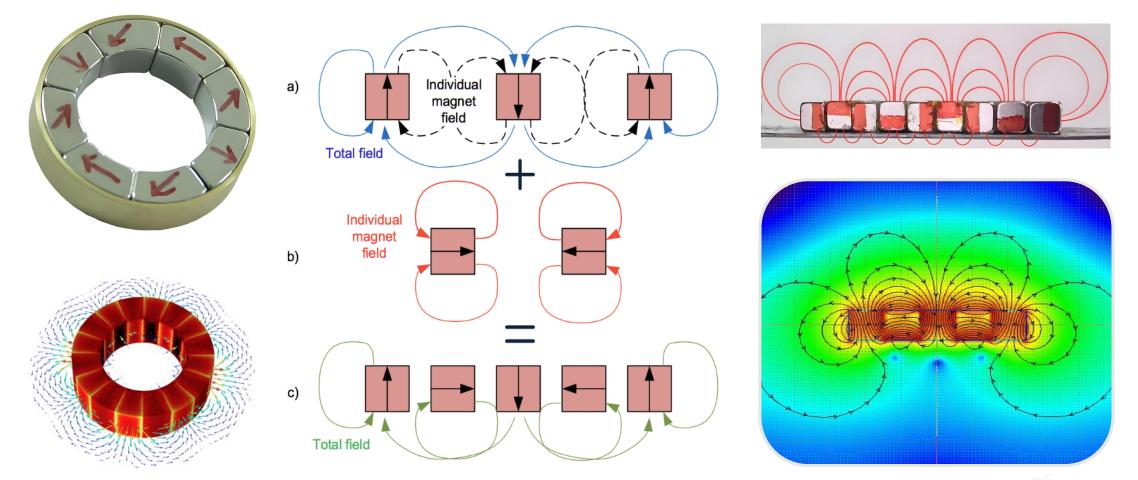

### Design and Manufacturing Services

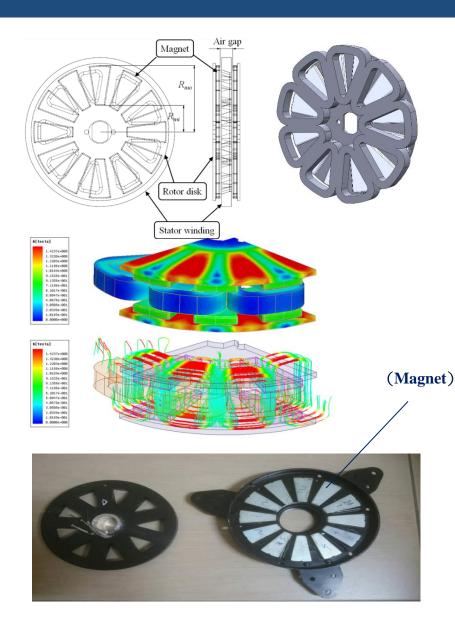

- High-precision and performance magnets, precision control of non-magnetic areas
- Flux value, Gauss value, tension value simulations and systems analysis
- Magnetic assembly hardware
   post processing
- Customized multi-pole magnetization solutions
- Halbach Array magnetization and assembly

### Halbach Array Magnet Assembly and Production Services

The Halbach Array is a type of magnetic structure that is an engineering approximation of an ideal configuration. Its goals are to maximize the output field, minimize weight, and reduce leakage. It is particularly applied in new energy vehicle motors and other devices. In 3C products, it is especially used in high-end wireless charging magnetic absorption module assemblies. The high-performance, ultra-thin Halbach Array magnetic components are integrated into these applications.

### **Motor/Generator Design and Simulation Analysis Services**

#### **Customized Magnet Design and Manufacturing**

Design magnet size, shape, and model to meet design requirements and reduce costs. Provide high-performance magnetic designs tailored for specific applications to ensure optimal efficiency and performance in motors/generators.

#### **Magnet Testing and Verification Services**

• Provide magnetic performance testing services to ensure compliance with design requirements and standards.

• Conduct magnet life testing and durability analysis to assist in improving product quality.

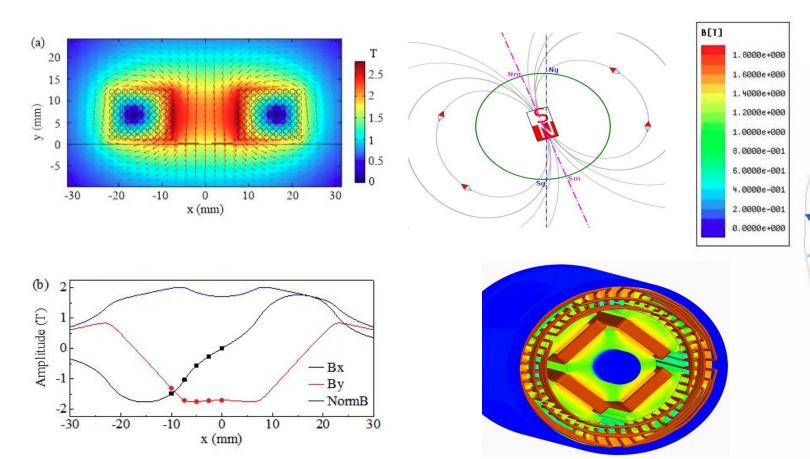

#### Motor Design Simulation and Optimization

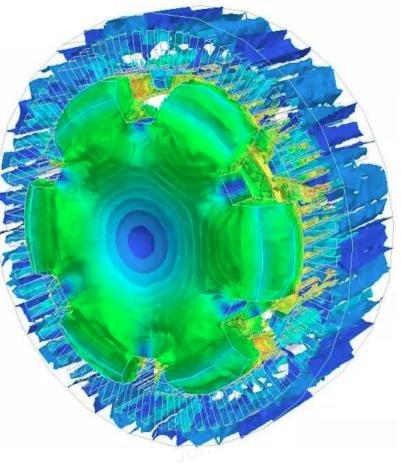

- Numerical simulation services for motor/generator design to ensure optimal magnetic circuit design and magnetic field distribution for key performance indicators.
- Electromagnetic, thermal, and mechanical performance analysis to ensure design stability and efficiency.
- Optimize existing motor designs to enhance performance, reduce losses, and extend motor lifespan.

#### **Technical Consultation and Solution Development**

- Professional consulting for magnetic material applications to help solve technical design challenges.
- Co-develop new motor technologies focusing on high-performance and high-density magnet applications.

### Motor/Magnetic Circuit Design and Magnetic Field Simulation Services

### **Phone In Group Corporate Culture**

Management Philosophy: **Humanization ★** Refinement **★** Service-oriented

**Corporate Vision:** 

To provide customers with more immersive magnetic application solutions and products for smart terminal devices.
